

CompoDock DM & DockMaster NET

Introducing the **NEW** CompoDock DM & DockMaster NET software packet.

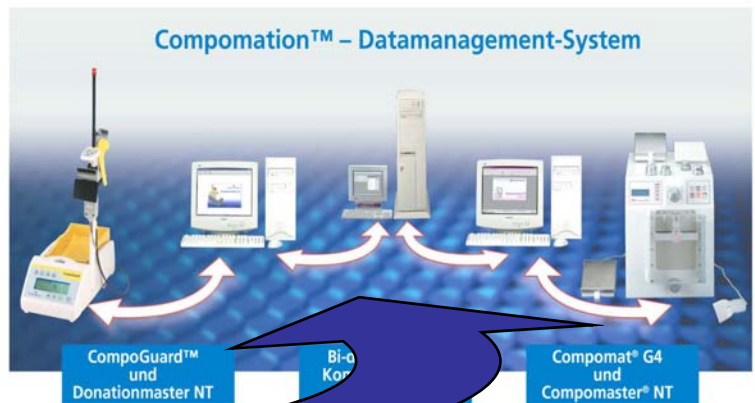

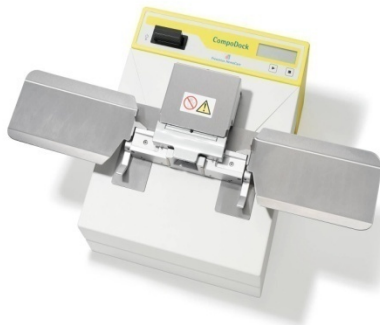

- Capture who is doing the docking for you and what products are being docked
- Track efficiencies in your lab
- Are you looking for automated cGMP documentation during sterile docking?
- Do you want to achieve SOP compliance within the docking process?

Trial a CompoDock DM with DockMaster NET and give us your feedback on this brilliant system that captures cGMP relevant data during the docking process, provides SOP prompts to support lab staff compliance with YOUR SOPs, and tracks staff efficiencies.

Share your opinion on documentation needs during the docking process and ask your local representative about our special promotion in your area.

- Offered for any standard PC with Windows XP operating system, USB and/or Ethernet connections
- Easy to use Windows based outline
- ASCII data can be transferred to host computer and imported into Excel
- ASCII can be used for interfacing to Blood Center Host Computer Systems
