Affinity™ 4 Birthing bed

Delivering Safety

Our birthing bed is the perfect combination of safety and ease of use

The only birthing bed you'll need

In labour and delivery, every second counts. You must be able to respond quickly and easily, especially in an emergency.

The Affinity 4 birthing bed delivers on the promise of a safe birthing bed that functions in the busiest environment with ease. No more hassle with a removable foot section. With the Affinity 4 Stow and Go™ feature, the integrated foot section simply slides under the bed for birth and back into place afterward. Or, if you choose our ergonomically designed lift-off version, simply place the foot section on the built-in stand.

Ergonomic push handles and integrated permanent IV poles.

Safety for patients and caregivers

- Foot section easily slides back into place

- EasyGlide™ calf supports

- Four dual-locking casters to keep the bed securely in place

- Hill-Rom® high quality foam mattress for comfort and pressure redistribution

- Automatic pelvic tilt to reduce patient migration

- Clean perimeter around the bed with no protruding pieces

- Optional ergonomically designed lift-off section

Ease of use

- No-lift, Stow and Go™ foot section

- Battery backup

- Zero transfer gap

- Easy-to-use gas-assist Trend mechanism

- OneStep™ siderail release

New Options

- Ergonomic push handles with integrated IV pole cradle

- Integrated line managers

- Integrated permanent IV poles

The Affinity 4 bed is designed to make every movement fast and easy

Less time, less hassle

In labour and delivery, staff time is at a premium. No one can spare even a few minutes to search for equipment, look for an outlet or use complicated controls. The Affinity 4 bed is designed to reduce the hassles you face every day.

- The Stow and Go foot section slides and stores under the bed – no lifting required. The foot section easily slides back into place without false latching or interference with linens.

- With battery backup, you can use all the bed's features, including changing height and position, when you're away from an outlet, reducing the time from "decision to incision" in critical situations.

- The gas-assist Trend mechanism allows head elevation to immediately lower to 8 degrees.

- OneStep siderail release provides zero transfer gap for safer and easier patient transfers.

- The bed's streamlined design, with all the equipment stored completely within the perimeter (instead of protruding out), protects you as you move quickly around your patient.

The Affinity 4 bed brings dozens of safety features to the bedside

Safety and convenience

We have designed every detail of the Affinity 4 birthing bed to help make the birthing experience safer for you and your patient.

- The foot section locks firmly and easily in position.
- EasyGlide calf supports swing into the correct position and lock with a single lever, staying firmly in place.
- Trend mechanism, with improved springs and seals, makes lowering and lifting an easy, one-person job.
- Inflatable air pillows in back and seat decrease the need to reposition the patient for delivery.
- Four dual-lock casters keep the bed in place.
- Hill-Rom Comfortline™ foam mattress options for pressure redistribution and superior comfort, especially on the vulnerable seat area.
- Automatic pelvic tilt and optional v-cut mattress provide better access to patient for birth.

An optional lift-off foot section is available. Lightweight and easy to handle, the foot section can be stored on a built-in stand.

EasyGlide calf supports are larger, with a strong release lever that can be actuated from any angle with one hand.

Patient-friendly grips and siderails make it easier for patients to get up and moving.

Automatic pelvic tilt to 15 degrees helps keep the patient in place during labour and improves positioning during birth.
